Child & Pet Safe*

Use All Year Round

Great Coverage

Use on Block Paving, Paving Slabs, Tarmac, Artificial Grass, Gravel and Decorative Aggregates, Decking, Concrete, Stone, Brickwork, Roofs, Rendering, Timber.

Block Blitz is not a one off cleaning product. The Block Blitz solution is made from a powerful mineral and plant-based powder which has been designed as a treatment system to gradually clean and protect outdoor surfaces. Include Block Blitz as part of your yearly outdoor maintenance programme.

APPLICATION GUIDELINES: Always apply to a dry surface. Do not apply if rain is forecast within the next 24 hours.

STANDARD APPLICATION: Apply Block Blitz every 5 - 6 months at any time of the year.

SURFACES THAT ARE IN POOR CONDITION: Grimy, covered in algae and have moss/weed growth in jointing material – Follow steps 1 - 3.

STEP 1: Apply first application of Block Blitz. Leave to work for minimum of 2 weeks.

STEP 2: Spot treat any weed growth and moss with a weed removal product.

STEP 3: Apply second treatment of Block Blitz four weeks after first treatment. Block Blitz will gradually break up surface debris and slowly disperse over time.

INSTRUCTIONS: Wear suitable gloves and eye protection. Wear suitable clothing and footwear. Fill a 10-litre plastic watering can (fitted with a medium plastic rose) with cold water. Empty one pouch of Block Blitz into the 10 litres of cold water. Stir the solution until fully dissolved. Apply to the surface at the highest point to control run off. Excessive run off could damage grass and plants. Apply evenly to soak surface area. Leave to dry. Rinse off equipment with clean cold water. Block Blitz Original can also be applied with a pressure sprayer. Measure out 10 litres of cold water into a bucket, slowly add one pouch and stir until fully dissolved. Carefully decant solution into spray equipment. Apply evenly to soak surface area. Rinse out equipment with clean cold water.

***KEEP CHILDREN AND PETS OFF TREATED SURFACES UNTIL FULLY DRY.**

PLEASE NOTE: Prior to use it is advisable to test a small inconspicuous area of the surface to be treated to check for suitability. Do not use on galvanised metals. Not suitable for use with some types of Polymeric jointing compounds. Block Blitz may leave a white residue, this is not hazardous and rainfall will slowly wash it away.

BE PATIENT: Allow rainfall to rinse your surface. Block Blitz will gradually start to transform your surface. Please note Block Blitz will not restore the colour of weathered surfaces. Block Blitz has a slow secondary cleaning effect which will help prevent the re-growth of algae and moss for months afterwards. Block Blitz will also clean jointing material helping to deter future weed growth. Any newly emerging weeds can be spot treated with a weed removal product.

IMPORTANT: NEVER ADD WATER TO BLOCK BLITZ, ALWAYS ADD BLOCK BLITZ TO WATER. IF YOU GET ANY POWDER ON YOUR SKIN WASH OFF IMMEDIATELY WITH COLD WATER.

Do not mix with other cleaning products or acids. Do not inhale dust or mist. Only use in well ventilated area. Do not use in contact with aluminium surfaces. Block Blitz can discolour some painted and varnished surfaces. Rinse off any contaminated surfaces with cold water.

INGREDIENTS: Mineral extracts, Minerals, Plant extracts, Saponified plant oils, Glycerine.

CONTAINS: Sodium Hydroxide, Sodium Metasilicate.

POWDERED CONCENTRATE

CAUTION: Keep out of reach of children. May be corrosive to metals. Causes severe skin burns and eye damage. Wash hands thoroughly after handling. Wear skin and eye protection. **IF SWALLOWED:** rinse mouth. **DO NOT** induce vomiting. **IF ON SKIN** (or hair): remove immediately all contaminated clothing. Rinse skin with water/ shower. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do so. Continue rinsing. Dispose of contents in accordance with local regulations.
