MINERAL & PLANT BASED FORMULATION

+ ACTIVE BOTANICALS

100% RECYCLABLE PACKAGING

ZERO WASTE TO LANDFILL

Block Blitz® Block Paving Treatment.
Each pouch covers approximately 15sqm of block paving.

Block Blitz is not a one off cleaning product. The Block Blitz solution is made from a powerful mineral and plant-based barrier detergent which has been designed as a treatment system to gradually clean and protect block paving. Include Block Blitz as part of your outdoor maintenance programme.

APPLICATION GUIDELINES: Always apply to a dry surface. Don't apply if rain is forecast within the next 24 hours.

STANDARD APPLICATION: Apply Block Blitz every 5-6 months any time of the year.

PAVING THAT IS IN POOR CONDITION: Grimy, covered in algae and has moss/weed growth in jointing material – Follow steps 1 – 3.

STEP 1: Apply first application of Block Blitz. Leave to work for a minimum of 2 weeks.

STEP 2: Spot treat any remaining weed growth with a weed killing product.

STEP 3: Apply second treatment of Block Blitz 4 weeks after first treatment. Block Blitz will gradually break up moss/debris in paving joints and slowly disperse over time.

INSTRUCTIONS: Wear suitable gloves and eye protection. Wear suitable clothing and footwear. Fill a 10 litre plastic watering can (fitted with a medium plastic rose) with cold water. Empty one pouch of Block Blitz into the 10 litres of water. Stir the solution until fully dissolved. Apply to the paving at the highest point to control run off. Excessive run off could damage grass and plants. Apply evenly to soak surface area. Leave to dry. Rinse off equipment with cold water.

***KEEP CHILDREN AND PETS OFF TREATED AREAS UNTIL DRY.**

PLEASE NOTE: Prior to use it is advisable to test a small inconspicuous area of the surface to be treated to check for suitability. Block Blitz may leave a white residue, rainfall will gradually wash this away.

BE PATIENT: Allow rainfall to rinse your paving. Block Blitz will gradually start to transform your paving. Please note Block Blitz will not restore the colour of weathered surfaces. Block Blitz has a slow secondary cleaning effect which will help prevent the regrowth of algae and moss for months afterwards. Block Blitz will also clean jointing material, helping to deter future weed growth. Any newly emerging weeds can be spot treated with a weed killing product. However, the more you use Block Blitz, the more the paving joints will become resistant to weed growth.

IMPORTANT: NEVER ADD WATER TO BLOCK BLITZ, ALWAYS ADD BLOCK BLITZ TO WATER. IF YOU GET ANY POWDER ON YOUR SKIN, WASH OFF IMMEDIATELY WITH COLD WATER.

Don't mix with other cleaning products or acids. Don't inhale dust or mist. Only use in well ventilated area. Don't use in contact with aluminium surfaces. Block Blitz can discolour painted and varnished surfaces. Rinse off any contaminated surfaces with cold water.

DANGER

INGREDIENTS: Mineral extracts, Minerals, Plant extracts, Saponified plant oils, Glycerine.

CONTAINS: Sodium Metasillicate, Sodium Hydroxide.

CAUTION: Keep out of reach of children. May be corrosive to metals. Causes severe skin burns and eye damage. Wash hands thoroughly after handling. Wear skin and eye protection.
